TetraPlay Grass

Synthetic Landscape Grass

Providing superior performance, TetraPlay Grass synthetic landscape grass has been designed to suit the landscape of residences, outdoor spaces, commercial buildings and recreational areas. TetraPlay Grass' is engineered with high quality yarn and turfing process to replicate the characteristics and softness of natural grass yet being durable to withstand foot traffic and UV rays from the sun.

With excellent water permeability, worry no more on water accumulation after a heavy downfall.

Being environmentally friendly, TetraPlay Grass is manufactured with stringent quality control processes. All TetraPlay Grass products are free from harmful substances and heavy metals besides being fire retardant in nature.

Replicates a Natural Finish

Designed to suit a natural landscape, TetraPlay Grass replicates the scenery of nature as you take a stroll on the park during summer. This model is suitable for both indoor and outdoor landscaping.
